Retirement Benefits

You have earned enough credits to qualify for retirement benefits. To qualify for benefits, you earn "credits" through your work — up to four each year. Your full retirement age is 67, based on your date of birth: April 10, 1960. As shown in the chart, you can start your benefits at any time between ages 62 and 70. **For each month you wait to start your benefits, your monthly benefit will be higher—for the rest of your life.**

These personalized estimates are based on your earnings to date and assume you continue to earn \$51,995 per year until you start your benefits. To learn more about retirement benefits, visit ssa.gov/benefits/retirement/learn.html.

Disability Benefits

You have earned enough credits to qualify for disability benefits. If you became disabled right now, your monthly payment would be about **\$1,656 a month**.

Survivors Benefits

You have earned enough credits for your eligible family members to receive survivors benefits. If you die this year, members of your family who may qualify for monthly benefits include:

Minor child:	\$2,129
Spouse, if caring for a disabled child or child younger than age 16:	\$2,129
Spouse, if benefits start at full retirement age:	\$2,838
Total family benefits cannot be more than:	\$4,968
Your spouse or minor child may be eligible for an additional one-time death benefit of \$255.	

Personalized Monthly Retirement Benefit Estimates (Depending on the Age You Start)

Medicare

You have enough credits to qualify for Medicare at age 65. Medicare is the federal health insurance program for:

- people age 65 and older,
- under 65 with certain disabilities, and
- people of any age with End-Stage Renal Disease (ESRD) (permanent kidney failure requiring dialysis or a kidney transplant).

Even if you do not retire at age 65, you may need to sign up for Medicare within 3 months of your 65th birthday to **avoid a lifetime late enrollment penalty**. Special rules may apply if you are covered by certain group health plans through work.

For more information about Medicare, visit medicare.gov or ssa.gov/medicare or call **1-800-MEDICARE (1-800-633-4227)** (TTY 1-877-486-2048).

We base benefit estimates on current law, which Congress has revised before and may revise again to address needed changes. Learn more about Social Security's future at ssa.gov/ThereForMe.

Earnings Record

Review your earnings history below to ensure it is accurate. This is important because we base your future benefits on our record of your earnings. There's a limit to the amount of earnings you pay Social Security taxes on each year. Earnings above the limit do not appear on your earnings record. We have combined your earlier years of earnings, but you can view them online with [my Social Security](https://my.ssa.gov). If you find an error view your full earnings record online and call **1-800-772-1213**.

Earnings Not Covered by Social Security

You may also have earnings from work not covered by Social Security. This work may have been for federal, state, or local government or in a foreign country.

If you participate in a retirement plan or receive a pension based on work for which you did not pay Social Security tax, it could lower your benefits. To find out more, visit ssa.gov/gpo-wep.

Important Things to Know about Your Social Security Benefits

- Social Security benefits are not intended to be your only source of retirement income. You may need other savings, investments, pensions, or retirement accounts to make sure you have enough money when you retire.
- You need at least 10 years of work (40 credits) to qualify for retirement benefits. Your benefit amount is based on your highest 35 years of earnings. If you have fewer than 35 years of earnings, years without work count as 0 and may reduce your benefit amount.
- We use cost of living adjustments so your benefits will keep up with inflation.
- The age you claim benefits will affect the benefit amount for your surviving spouse.
- If you get retirement or disability benefits, your spouse and children also may qualify for benefits.
- If you are divorced and were married for 10 years, you may be able to claim benefits on your ex-spouse's record. If your divorced spouse receives benefits on your record, that does not affect your or your current spouse's benefit amounts.
- When you apply for either retirement or spousal benefits, you may be required to apply for the other benefit as well.
- For more information about benefits for you and your family, visit ssa.gov/benefits/retirement/planner/applying7.html.
- When you are ready to apply, visit us at ssa.gov/benefits/retirement/apply.html.
- The *Statement* is updated annually. It is available upon request, either online or by mail.

Retirement Estimator

Your Retirement Benefit Estimate

The age that you start your benefits determines how much you receive each month.

We created estimates for you at three common retirement ages using your earnings information. You can also add your own custom estimates by changing your stop work age and future earnings.

If you start your benefits:	And you earn an average of:	Your benefit will be about:
At age 65	\$45,000 a year (from now until age 65)	\$1,434 a month
At full retirement (age 67)	\$40,000 a year (from now until full retirement)	\$1,525 a month
At age 70	\$40,000 a year (from now until age 70)	\$1,891 a month
At age 62	\$40,000 a year (from now until age 62)	\$1,040 a month

- Convenient, secure, and quick financial planning tool
- Immediate and accurate benefit estimates
- Create “What if” scenarios based on different ages and earnings

How You Qualify for Benefits

- You need to work to earn Social Security “credits”
- Each \$1,730 in earnings gives you one credit
- You can earn a maximum of 4 credits per year

Example: To earn 4 credits in 2024, you must earn at least **\$6,920**. Earning 40 credits (10 years of work) throughout your working life will qualify you for a retirement benefit.

How Social Security Determines Your Benefit

Social Security benefits are based on your lifetime earnings

- **Step 1** –We adjust or “index” your actual earnings to account for changes in average wages over time
- **Step 2** –We find your average indexed monthly earnings using the 35 years in which you earned the most (do not need to be consecutive and do not need to be most recent)
- **Step 3** –We apply a formula to your “average indexed monthly earnings” and arrive at your basic benefit or primary insurance amount

Your Age at the Time You Elect Retirement Benefits Affects the Amount

Year of Birth	Full Retirement Age	% at age 62	% at age 70
1943-1954	66	75.0%	132.00%
1955	66 + 2 months	74.2%	130.67%
1956	66 + 4 months	73.3%	129.33%
1957	66 + 6 months	72.5%	128.00%
1958	66 + 8 months	71.7%	126.67%
1959	66 + 10 months	70.8%	125.33%
1960 or later	67	70.0%	124.00%

If You're a Worker and Start Retirement Benefits

- At age 62, you get a permanent lower monthly payment
- At your full retirement age, you get your full benefit
- After your full retirement age, you get an even higher monthly payment for delaying

Special Payments After Retirement

Bonuses, Vacation Pay, Commissions, Sick Pay, Insurance Commissions, Carryover Crops, and Other Special Payments

What are “special payments”?

After you retire, you may receive payments for work you did before you started to receive Social Security benefits. Usually, those payments will not affect your Social Security benefit if they are for work done before you retired. This fact sheet describes some of the more common types of special payments, helps you to decide if you received any, and tells you what steps to take if you did.

What qualifies as a special payment?

If you worked for wages, income received after retirement counts as a special payment. This applies if the last task you did to earn the payment was completed before you stopped work. Some special payments to employees include bonuses, accumulated vacation or sick pay, severance pay, back pay, standby pay, sales commissions, and retirement payments. Another example of a special payment is deferred compensation reported on a W-2 form for 1 year but earned in a previous year. These amounts **may** be on your W-2 in the box labeled “Nonqualified Plan.”

If you were self-employed, any net income you

How do earnings limits affect benefits?

If a person who gets Social Security retirement benefits is younger than their full retirement age, there are limits to how much they can earn from work before it affects their benefits. Your full retirement age varies based on the year you were born. You can visit www.ssa.gov/benefits/retirement/planner/ageincrease.html to find your full retirement age. We reduce benefits, if earnings exceed certain limits.

- If you are younger than your full retirement age, we deduct \$1 in benefits for each \$2 you earn above the earnings limit. In 2024, the limit is \$22,320.
- In the year you reach your full retirement age, we reduce your benefits \$1 for every \$3 you earn above the earnings limit. In 2024, the limit is \$59,520.
- Starting with the month you reach full retirement age you can receive full benefits no matter how much money you earn.

If you think you received a special payment
